## YOUR UNIQUE CUSTOM ORTHOTIC TECHNOLOGY BUILT RIGHT IN!

LBG Medical produces prescription orthotic sandals in partnership with popular sandal brand 'Strive Footwear'. If you already wear Langer custom orthotics, our laboratory already has your foot measurements and prescription details, enabling us to mirror the exact orthotic prescription in a sandal of your choosing. If you do not wear Langer custom orthotics, the process begins when your practitioner casts your feet.

### HOW DOES IT ALL WORK?

- Once we receive your cast impression, our experienced technicians use the latest technology to fabricate individually custom made orthotic footbeds. These accurately reflect the unique natural contours of your feet.
- Those orthotic footbeds are then incorporated into your chosen sandal style by traditional hand-craftsman right here in the UK.

### HOW WILL CUSTOM SANDALS BENEFIT YOU?

- When you don't wear your shoes, you don't wear your orthotics either - Meaning no therapy!
- Custom 'Strive' sandals can be worn instead of typical un-supportive footwear and during barefoot and slipper wearing hours. This can increase your orthotic wearing time in those warmer months by as much as 30%.
